SANDMASTER

ABRASIVES

ABRASION INNOVATION

INVESTING IN THE FUTURE

- Sandmaster is the world's largest manufacturer of foam based abrasives with over 99% exported.
- Production facility increased to 20,000 sq.m. (over 250,000 sq.ft.) in March 2005.
- Sandmaster design and build their own specialist production equipment.
- Innovation, quality and commitment combine to make Sandmaster the Number One manufacturer of foam based abrasives.
- Sandmaster control their entire manufacturing process
- Block mould their own specially formulated foam
- Apply specialist adhesives and abrasives
- Print on foam in-house
- Quality through total control of the production process, ensures world leading standards.
- Sandmaster only manufactures for other manufacturers and major distributors, not the end user. You can trust in ethical trading and supply.
- Sandmaster products are used in diverse industries - automotive, engineering, furniture, craft, home improvement, cosmetic etc., in fact wherever performance matters.

ENVIRONMENTAL

Sandmaster has a strong commitment to the environment and works to exceed government standards. Its continuous process of improvement in manufacture, materials and technology are focused on providing better and more eco-friendly products.

- Recycling foam to make chip foam products
- Investment in solvent-free processes
- Reduced use of solvents

OVATION

HI-FLEX SPONGES

Designed to follow the contours of the surface being sanded, Hi-Flex sponges are ideal for use in the furniture, automotive and other industries where a high quality finish is required.

- Highly flexible
- Crease resistant, non-cracking
- Can be washed and re-used
- Last longer than the equivalent grade of sandpaper
- Can be used wet or dry
- Sandmaster's own unique formula
- Available in standard or coloured foam

SANDING BLOCKS

Sandmaster Foam Sanding Blocks can be used with wood, metal, plaster, plastic, fibre glass, paintwork etc. Their semi-rigid construction allows flexible and accurate control for sanding profiles and flat surfaces.

- Available in a range of coatings and grades
- Strong and durable
- Outlasts the equivalent grade of sandpaper
- Finer finish than the equivalent grade of sandpaper
- Can be used wet or dry
- Range of sizes
- Sandmaster's own unique foam formula

HOOK & LOOP FOAM PADS

Sandmaster Hook & Loop Foam Pads are designed to fit most brands of professional and DIY power tools. They have a unique foam construction coated on one side with abrasive grit, and loop material on the reverse. Ideal for all types of woodworking, automotive and aircraft industry use.

- Available in three foam thicknesses
- Available with or without dust extraction holes
- Usable wet or dry
- Loop side designed to adhere to almost all 'Hook' materials
- Long life and re-usable

ORBITAL SANDING PADS

Manufactured from high quality soft foam, coated on both sides with abrasive grit. Their flexible structure works with your machine to "soften" the effect of the abrasive to produce a much finer finish than conventional sandpaper. Sandmaster Orbital Sanding Pads are ideal for woodworking, flooring etc.

- For a finer, smoother finish
- Usable wet or dry
- Available with or without dust extraction holes
- Range of sizes to fit most orbital sanders

SPECIALIST

Products designed for particular uses or personalised to an individual company.

- **Sanding Pads**
Manufactured from Sandmaster's unique high quality foam. These pads are abrasive coated on one side only for ease of use and flexibility.
- **Cosmetic**
Designed for the growing nail care industry with special adhesives combined with non-porous closed cell foam to ensure good hygiene
- **Own Brand**
Foam blocks can be personalised with any information you require using Sandmaster's in-house print facility. Sandmaster only work with manufacturers and distributors. Therefore, you can be fully confident in contracting your own brand requirements to them.
